

**Noemí V. Mendoza Díaz** is the Technology Integration Specialist for the Brazos School for Inquiry and Creativity, a P-12 Charter School in the College Station and Houston, Texas areas. She is also the Coordinator of the Community of Engineering Education for the University Corporation for the Advancement of the Internet in Mexico. In 2006, Dr. Mendoza Díaz obtained her Ph.D. from Texas A&M University in Educational Administration and Human Resource Development and during 2007-2009 she worked as a Postdoctoral Researcher with the Institute for P-12 Engineering Research and Learning (INSPIRE) at Purdue University. Prior to her arrival to the US, she had been an Electrical Engineering Professor for two Mexican universities.

In 2009, she was awarded with the prestigious Apprentice Faculty Grant from the Engineering Research Methods Division of ASEE. Her research interest is in the engineering education K-20 spectrum seen as a continuum. She is also interested in pre-college and college engineering readiness, relevant engineering learning, and theory building in engineering education.
