

Thomas Kramer

Thomas Kramer, CCIE 2662, has been working over the past 10 years at Cisco Systems, both in EMEA and in Latin America. Since five years he is based in Mexico City, where he works as a Consulting Engineer in Core and IP Routing Technologies throughout the Latin American theater with a focus on Service Providers.

Thomas is a frequent speaker at different industry events. He participated as technical reviewer in several Cisco Press books and actively contributed to a number of other Cisco publications.

Thomas holds a master degree in electrical engineering and telecommunication as well as an active CCIE status in Routing and Switching.
